CE Mark is a statement by the manufacturer that the product complies with all relevant European directives and standards

Equipment must be earthed

Suitable for direct mounting on normally flammable surfaces

Protected against low pressure jets of water

**IP65 Fluorescent Fitting**

## APPLICATIONS:

## About NVC Lighting

NVC Lighting Technology Corporation is now the largest lighting manufacturer in China. We have a broad range of products for professional and domestic use, supported by extensive research, development and manufacturing facilities.,

Our product ranges includes commercial, office, outdoor and residential lighting, plus lamps and gear and a full range of electrical accessories. NVC was founded in 1998 and quickly became famous for its quick reactions to market changes. Such reactions resulted in a consistent and rapid growth in sales, which reached 600 million USD in 2009.

We have now started to market our products under the NVC brand outside China. Operating through a network of 1500 distributors and 2500 exclusive retail outlets in China and overseas NVC is now active throughout Asia, the Middle East, Africa, Europe, Australia and Latin America.

Thanks to investment in 2006 from Softbank & Goldman Sachs, and our recent flotation on the Hong Kong stock exchange, NVC has been able to recruit senior figures from the lighting industry and elsewhere to build a strong management team. This, coupled with a solid capital structure, has enabled NVC to accelerate its rate of business development both in China and overseas.
